An interview was conducted between the undersigned and Examiner Moore on April 24, 2006.

Claims 26, 33, 43, 53, 56, and 59 were discussed. With respect to claims 26, 33, and 43, the undersigned emphasized that the applied prior art did not disclose, or suggest, at least a portion of the chamber liner apparatus being selectively movable to fully expose the passageway to the chamber and to fully cover the passageway from the chamber and to form a gas-tight seal between the passageway and the chamber. Subject to further consideration, the Examiner agreed that such was not shown or suggested in the cited Ohkase or Okase references.

With respect to claims 53, 56, and 59 the undersigned emphasized that the applied prior art did not disclose, or suggest, at least a portion of the chamber liner apparatus comprising opposing sidewall sections having inner faces and a base extending from and received between the opposing sidewall inner faces, with such portion including the opposing sidewall sections and the base being selectively movable to fully expose and to fully cover the passageway to the chamber, and regardless of whether a gas tight seal is formed. The Examiner concurred with this assertion, subject to further consideration.

Respectfully submitted,

Dated: 5-1-06
